Education Session:2:15 to 3:30

PHYSICAL PERFORMANCE TESTING:

Using multipurpose test batteries

PQRS: Is it right for you?

Questions and Answers:

Adjourn.....3:30

This course has 6.0 actual contact hours and is suitable for Physical Therapists and Assistants.

It may be of interests to Occupational Therapists and Rehab Managers.

COURSE OVERVIEW:

This highly interactive course provides participants with some of the tools to support Medicare’s guidelines for medically necessary services in all sites of service.

Topics include use of questionnaires to assist the therapist with the completion of some of the required medical and psychosocial history required as supportive background information to establish medical necessity of services and support goals established.

Test and Measures used provide the initial baseline measurements to support that skilled therapy services are medically necessary at evaluation as well as indicating progress throughout care.

Attendees will practice 8 - 10 functional tests and be able to incorporate them into their clinical setting.

The workbook contains copies of all tests taught and will become a valuable resource for the clinic.

COURSE OBJECTIVES

Upon completion of the program, the participant will be able to:

1. Assimilate questionnaires into their practice to support prior level of function, Medical and Psychosocial History as required by Medicare regulations.

2. Determine the most appropriate assessment tool to use with each patient based on diagnoses, comorbidities and complexities.

3. Compare and Contrast the tests and measures that are available to identify falls risk and apply them to their practice.

4. List the measures that can be utilized to participate in the PQIS.

REGISTRATION FORM:

*Early bird price is valid up to 2 weeks prior to seminar
Group Price: is per attendee registering together*

Tests, Measures and Questionnaires
